

Breaking: Hoosier incomes stuck at 38th in the U.S., trail national average for growth

U.S. Bureau of Economic Analysis

Indiana's personal income remains stuck at #38 in the U.S. again, after income growth of 4% trailed the national average of 4.4% growth over the past year, according to [new data](#) released Thursday by the U.S. Department of Commerce Bureau of Economic Analysis.

Helping to keep Indiana from slipping below #38: "[Indiana enjoyed one of the biggest boosts in income in the last quarter of 2015, thanks to bonuses paid to workers represented by the United Auto Workers for ratifying new contracts.](#)"

Despite increased employment and productivity, Indiana's pattern of failing to take up policy opportunities to boost the economy and working families continues to hold back the more than 1 in 3 Hoosiers living below self-sufficiency. See what policies were left on the table in the recently-completed session of the General Assembly: <http://iiwf.blogspot.com/2016/03/miss-or-make-general-assembly.html>

DONATE NOW to support policies that promote economic mobility for *all* Hoosier families.
